About Us

Colugo is a leading unmanned aerial systems (UAS) provider with a proven track record of success. The company's products are based on a breakthrough global patent and represent a "game-changer" in the eVTOL market. With hundreds of hours in operational missions under challenging scenarios without malfunctions and a proven track record of performance in the most severe weather conditions, Colugo's technologies have earned their reputation as a mature and reliable solution.

As a rapidly emerging dominant player in the market, Colugo is poised to revolutionize the e-mobility landscape. Various customers, including government agencies, commercial enterprises, and research organizations, already use the company's innovative solutions. Colugo is committed to providing its customers with the highest quality products and services and constantly innovates to stay ahead of the curve.

The Problem

Fixed-wing VTOL cannot operate safely in windy conditions, especially when lifting heavy payloads.

Our Solution

Colugo ARC 20K builds upon the operationally proven ARC53, offering a larger, more capable platform. It retains the trusted performance of its predecessor while introducing major advancements. The unique tandem-body design enables seamless payload access, simplifying loading and unloading. With a significantly increased payload capacity, ARC20K is tailored for high-demand missions across diverse sectors. Thanks to Colugo's proprietary technology, the system operates with an ultra-low acoustic signature while maintaining exceptional stability and performance even in strong winds during all stages of flight.

Applications

- Search and rescue
- Autonomous patrols - using analytics capabilities
- Intelligence gathering
- Anomaly detection and changes
- Naval Operations
- Logistics
- Smart Integration for a variety of Payloads
- Sigt payloads

Advantages

- Operate safely in winds of 35 - 40 knots.
- Very silent / Low radar signature
- Payload to MTOW ratio (Shape agnostic)
- Live Hi-Res Streaming
- Operational in areas with no infrastructure
- Smart fail-safe logics
- GPS Denied capabilities
- Holistic easy to use system, including simulator for training
- Camera Guide - Fly by camera

Model	ARC1000	ARC53	ARC53H	^{in develop} ARC20
MTOW	13kg	25kg	35kg	88kg
Max Payload	3kg	5-10kg	5-7kg	20kg
Cruise Speed	60km/h	65km/h	65km/h	65km/h
Speed Range	0-90 km/h	0-120 km/h	0-120 km/h	0-120 km/h
Flight Range Up to*	100km	200km	720km	180km
Flight Endurance Up to*	120 Minutes with 4kg payload	180 Minutes with 5kg payload	12 Hours with 5kg payload	180 Minutes with 20kg payload

ARCCargo

Colugo has won the project for 2025 at the Israeli Innovation Authority and will build the first one of a kind Cargo Drone that can carry 100kg!

Payloads & Tools

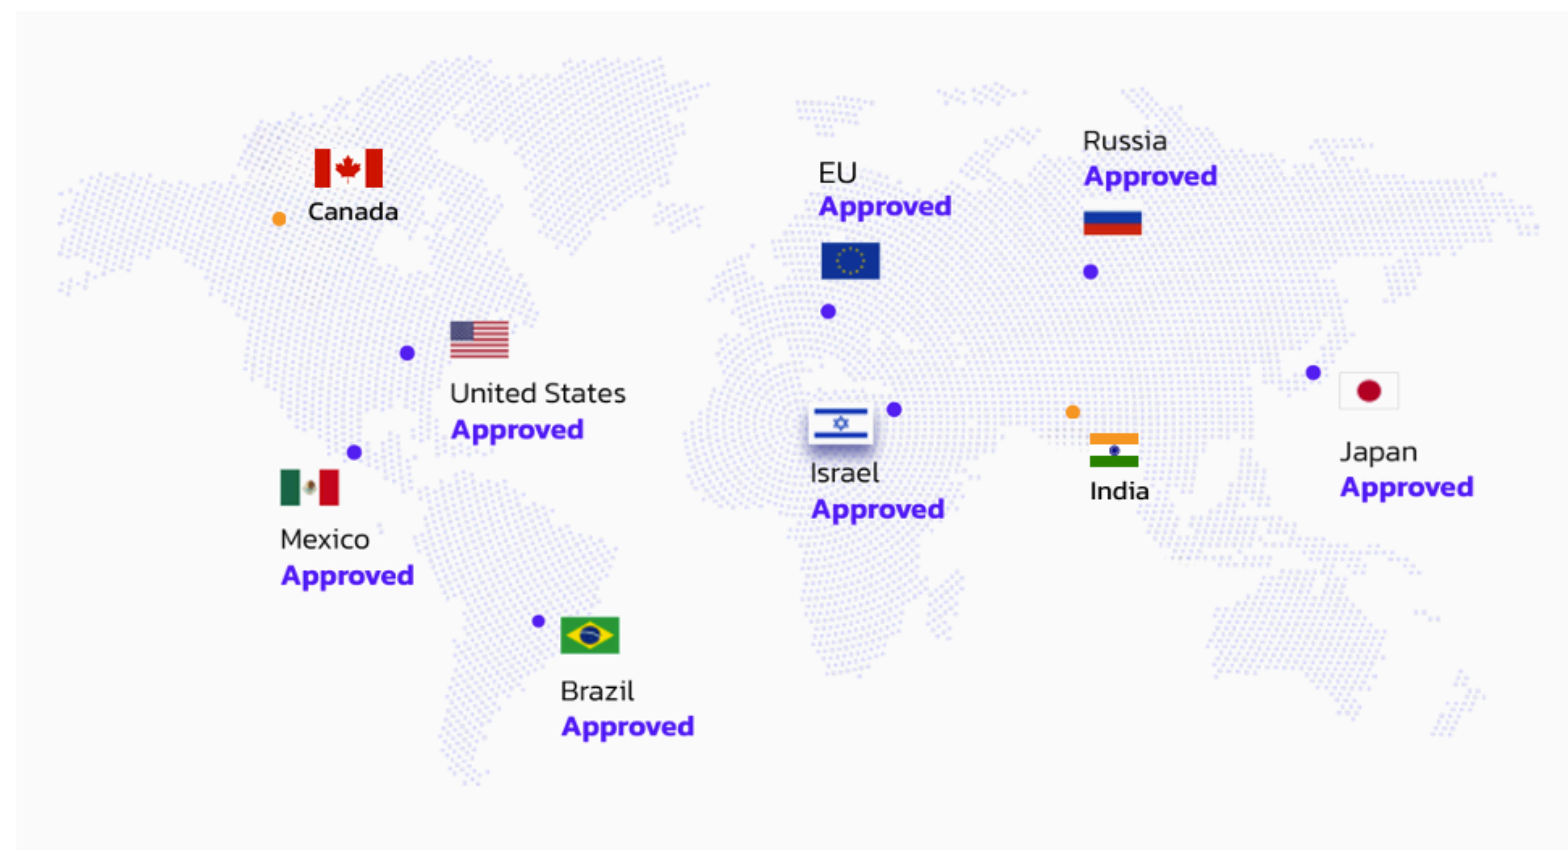

Colugo aircraft have a universal mount integrated into its unique design.

The following is a small portion of our mission-proven payloads.
